## Why Career Education?

With an in-demand Career Education from an Inland Empire/Desert-region community college, students are getting the state-of-the-art skills they need to *level up* their paychecks and their lives.

With 1,000,000 new “middle skills” jobs projected to surface by 2025, there has *never been a better time* to secure a future-ready Career Education.

Career Education programs are located throughout the San Bernardino and Riverside County and Desert regions, offering flexible class schedules at a fraction of the cost of public and private vocational schools.

## Workforce Ready

More than a quarter of the \$3.8 trillion global information and communication technology market resides in the United States, where it has created upwards of 10.5 million jobs. In California alone, projections suggest that 39% of all job openings will be ICT-related by 2022.

Demand in this industry is driven by the fact that employers in all industries have a tremendous need for workers with the latest computer-related software, hardware, networking, cyber-security, and telecommunications skills. This massive demand means that entry-level hourly wages for IT jobs tend to be significantly higher than average wages across other industries.
