Why Career Education?

With an in-demand career education from an Inland Empire/Desert-region community college, students are getting the practical skills they need to ensure the well-being of their *families*, their *communities*, and their *futures*.

Not only do career education graduates start their careers faster and with higher salaries than those with just high school diplomas, they enjoy more secure futures because they are less likely to be unemployed. Currently, career education graduates earn an average of \$66,000 five years after attending—almost \$27,500 MORE than those with general-focus Associate degrees, meaning that there has *never been a better time* to start your future-ready career program.

More Than Ready

The days of working in the arts and being a “starving artist” are over. Entertainment, especially in California, is big business. As the future of media continues to merge with new and emerging

technologies, the demand for technologically savvy designers and creative professionals will continue to grow.

Unlike other career pathways, jobs in the arts, media, and entertainment sector tend to be cross-disciplinary, demanding a constantly changing combination of imaginative and hands-on skills. Students in this sector generally study across a range of several different academic disciplines, in order to acquire a mix of technical and creative skills.

Your fastest path
to a brighter future!
