## Why Career Education?

With an in-demand career education from an Inland Empire/Desert-region community college, local professionals are getting the in-demand skills they need to make it to *move up the ladder*.

But career education is not just about gaining practical skills and securing a great job. It's about *laying the foundation* for a rewarding and safe future... *for yourself and for your family*.

With 1,000,000 new "middle-skills" jobs projected to surface by 2025, there has *never been a better time* to secure a future-ready career education.

## Progress Ready

The energy, construction and utilities sector is responsible for the construction of buildings of all types, as well as the installation and management of technologies related to the efficient creation, dispersal, and storage of energy.

With more than 48,000 energy-related companies, accounting for more than 461,200 jobs, California continues to set the pace for the future of energy. Nowhere is this more evident than in the Utilities industry, where demand has pushed annual salaries to increase by an overall average of \$24,713 (or 26.6%) since 2009.

California's ongoing commitment to improved energy efficiency and alternative fuel sources, coupled with a projected \$11.2 billion dollars in private and public investment in energy-related ventures, suggests that the future of this sector has *never been brighter*.

**Construct a career with  
a career education in energy,  
construction and utilities!**
