## Why Career Education?

With an in-demand career education from an Inland Empire/Desert-region community college, students are getting the state-of-the-art skills they need to *level up* their paychecks and their lives.

With 1,000,000 new “middle-skills” jobs projected to surface by 2025, there has *never been a better time* to secure a future-ready career education.

Career Education programs are located throughout the San Bernardino and Riverside County and Desert regions, offering flexible class schedules at a fraction of the cost of public and private vocational schools.

## Performance Ready

What will the future look like? Ask someone who works in the engineering and architecture sector. Workers in this sector combine creative visions with practical, real-world solutions using strong backgrounds in science and technology. Given the critical importance of the scientific and

technological work performed in this sector, job opportunities are always plentiful, even in times of economic downturn.

Students who pursue a career in this sector are involved in imagining, designing, and building the physical and informational structures of the future, as well as providing supporting laboratory, testing, research, and development services. The Bureau of Labor and Statistics forecasts that, by 2022, California will have the largest science, technology, engineering, and math (STEM) workforce in the nation, and

demand for qualified workers will continue to be found across all engineering disciplines.

An education with  
more hire power.
