Why Career Education?

Career education is not just about gaining practical skills and securing a job. It's also about setting the foundation for a rewarding and secure future... *for yourself, for your family, and for your community.*

With more than 1,000,000 new "middle-skills" jobs projected to surface by 2025, there has *never been a better time* to secure a future-ready career education.

Ready to rise? Your local community college can help you start up a bold new future, *right away!*

Always Ready

A public service is a service provided by the government for the benefit of its citizens. Generally speaking, "government jobs" are highly prized because of their benefits and retirement packages. They encompass everything from public safety and emergency response to community outreach

and vocational counseling. Students who want to make a difference in their communities by serving the public's interest should consider working in this sector.

Because jobs in this sector offer some of the best benefits and retirement packages available, their job markets tend to be highly competitive. As a result, students will generally find more opportunity and less competition for these jobs in their local organizations and agencies, in comparison to larger municipalities.

The power to do
more with your career.
