

## ***ICT/DIGITAL MEDIA***

**A living wage.  
A limitless future.**

From systems administrators to graphic designers to the security professionals that keep our networks safe, the future of Orange County industry depends on high-tech skills and training.

The ICT and digital media sector supports virtually every business in the region, and by 2022, is expected to account for nearly 40 percent of Orange County job openings. And with salaries averaging more than \$80,000 per year in California, now is the perfect time for tech-savvy individuals to turn their passion for systems, software, networking, or web into a great paycheck!

### **Opportunities on the Rise...**

- The U.S. Bureau of Labor Statistics projects a 13% increase in career opportunities for computer and information systems managers by 2026.
- By 2022, nearly 40% of all California job openings will be ICT-related.
- Career Education grads seeking employment in the ICT/digital media field reported an 81% success rate within six months!
